EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Attorney Justin Cassell on January 23, 2006.

The application has been amended as follows:

Claims:

Please cancel claims 31 and 48.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: No prior art of record disclose multilayer transfer material comprising optically variable material that conveys different color effects at different viewing angles and one machine readable feature substance that does not impair a visually visible optically variable effect of the optically variable material, wherein the optically variable material and the feature substance are disposed in one layer and the layer

being present in the form of information; and including all of the other limitations of the independent claims.

Kaule et al is the closest reference to read on applicant's invention. However, Kaule et al does not disclose a machine readable feature that does not impair a visually optically variable effect of an optically variable material; and wherein the optically variable material and the feature substance are disposed in one layer and the layer further being in the form of information.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Jotcham, Jones et al, Ryzi et al, Finkenzeller et al, and Adamczyk et al disclose similar documents of value.
